🔗 Leetcode

Full Stack Developer skilled in React, Node.js, MongoDB, and Python, with a strong grasp of scalable system design and modern web architecture. Passionate about building fast, secure, and user-focused applications, with growing knowledge of CI/CD workflows, cloud deployment, and DevOps fundamentals..

EDUCATION

Swami Vivekanad Education Society, *Bachelor of Science in Computer Science* | Mumbai, India

Expected 2026

SKILLS

Languages **JavaScript**, C++, **HTML5**, **CSS3**, **Python**

Frameworks & Tools **React.js**, **Node.js**, **Express.js**, **MongoDB** (MERN Stack), Git, REST APIs, Material UI CS

Fundamentals **Data Structures & Algorithms**, DBMS, OOP

Familiar With **Full Stack Development**, Scalable UI Systems, Basic **System Design**, Intro to Data Science

PROJECTS

ReadMe Generator – React, Tailwind CSS, Zustand [Github](#) - [Live](#)

- Engineered a full-featured **Markdown editor** to generate and preview GitHub-ready **README.md** files.
- Implemented **live preview**, syntax formatting, and export capability to support seamless documentation writing.
- Managed state using lightweight and performant **Zustand** store; focused on improving **developer UX**.
- Applied **Tailwind CSS** for fast and responsive styling, ensuring a clean, minimal design.

SecureNote – React, Vite, Node.js, Express, MongoDB, Material-UI, Formik, Yup [Github](#) - [Live](#)

- Designed and built a secure **full-stack application** enabling users to share confidential messages via one-time-use links that self-destruct after viewing or based on an expiration timer.
- Implemented client-side encryption, password protection with hashing, and email notifications upon note destruction.
- Integrated emoji support using emoji-picker-react, allowing users to personalize notes.
- Utilized **Material-UI** for UI components, **Formik & Yup** for form validation, and **Axios** for frontend-backend communication.
- Developed **RESTful APIs** with Express and MongoDB (via Mongoose); deployed frontend via Netlify and enforced code quality with **ESLint**.

React Store – React, Vite, Tailwind CSS [Github](#) - [Live](#)

- Created a scalable e-commerce frontend with **product listing**, **filtering**, and **cart management** features.
- Applied reusable **React components**, custom hooks, and conditional rendering for modularity.
- Used **Tailwind CSS** to ensure responsive design and clean layout across devices.

EXTRAS

- Solved **100+ problems** on [LeetCode](#) – earned **50-Day Streak Badge** for consistent practice and enhanced **problem-solving skills**.
- Solved **230+ problems** on [GeeksforGeeks](#) – strengthened **data structures**, **algorithms**, and **core programming concepts**.
- Maintained all submissions and practice logs publicly on [GitHub](#) to showcase continuous learning and code clarity.
